

14th June 2018

Field trips 15th June

Purpose

To enable those community groups and individuals involved in conservation on the West Coast to work more effectively and efficiently. This symposium will consist of a day of presentations at Shantytown near Greymouth, followed by field trips visiting local conservation projects.

The symposium will help you learn more about ecology, conservation, governance, management and fundraising while developing valuable networks.

There will be two themes, 'Ecology; the science underpinning conservation' and 'Operating a Community Conservation Group'. The range of skills, knowledge and experience we need to undertake effective conservation will be presented by experts in their fields, from professionals and scientists and from practitioners who have done it and learned from some of the hurdles and pitfalls.

The focus is on nature conservation although the community group sessions will be relevant to other community groups.

Registration \$75 per person, \$25 for students in full time education

Field trips

Visits to community conservation projects including the West Coast Penguin Trust's work at Seal Island and their Pahautane penguin protection fence, the Paparoa Wildlife Trust's kiwi crèche, the Cobden wetland restoration project (CASRA) and predator control at Motukiekie and or Punakaiki. One field trip will finish at the Conservation Volunteers site near Punakaiki with the opportunity to observe the Westland petrels returning to their colonies at dusk.

Timing and location

[Shantytown](#) (10km south of Greymouth), 14th June

Local field trips, 15th June

Symposium Programme, Thursday 14th June 2018, Shantytown

8.40-9.20	<i>Registration and tea/coffee</i>			
9.30-9.35	Welcome, WCPT		Kerry-Jayne Wilson	
9.35-9.45	Welcome, Ngati Waewae		Te Rua Mason	
9.45-10.15	West Coast natural heritage, what makes the Coast special and what have we to protect		Kerry-Jayne Wilson, West Coast Penguin Trust	
10.15-10.45	An over view of the skills and challenges needed to run a community group, who do we have to work with and who is there to help us.		Gillian Bishop, Tasman Environmental Trust	
10.45-11.15	<i>Morning tea</i>			
11.15-11.45	West Coast rain forest ecology		Dr Jon Sullivan, Lincoln University	
11.45-12.15	The ecology of predators and prey		Dr Graeme Elliott, DOC Scientist	
12.15-12.45	Predator Free NZ – landscape scale predator control for the West Coast		Mark Davies, DOC	
12.45-1.45	<i>Lunch / networking</i>			
1.45-2.15	DOC support for community conservation projects		Martin Rodd, DOC	
2.15-2.45	Volunteers: making the best of them and finding, keeping and rewarding the right people		Dr Jill Hetherington, DOC	
2.45-3.15	Fundraising: it's everybody's business, and busting the myths about fundraising		Kevin Hague, Forest & Bird	
3.15-3.45	<i>Afternoon tea</i>			
	<i>Ecology stream</i>		<i>Community Conservation Management stream</i>	
3.45-4.15	Forest succession	Dr Jon Sullivan, Lincoln University	Governance: what does it mean for Trustees	Phil Rossiter, Mokihinui-Lyell Backcountry Trust
